## PROFESSIONAL SUMMARY

---

Software Engineer with 4+ years building and operating production web applications and platforms from an enterprise LMS and device management systems to a self-run digital products business. Hands-on across React.js, Next.js, TypeScript, Java, and SQL, with growing focus on AI-assisted development and automation workflows (n8n, Webhooks) to ship faster and operate leaner.

## SKILLS

---

- **Web Development & Systems:** React.js, Next.js, JavaScript, TypeScript, Java, REST APIs
- **Database & Data Management:** MySQL, PostgreSQL, SQL Server, Java
- **AI & Automation:** Workflow Automation (n8n, Zapier), Workflow Mapping, Webhooks, Data Validation, API Integration
- **Project Management:** Jira, Confluence, Git, GitHub, GitLab
- **Productivity & Admin:** Google Workspace, Microsoft 365, Notion, Google Drive
- **Communication:** Zoom, Microsoft Teams, Google Meet

## WORK EXPERIENCE

---

### Web Platform Operator

Self-Employed | Cebu City, Philippines | June 2025 - Present

- Built and solely operated a digital products platform, independently handling website administration, customer accounts, secure product delivery, and ongoing maintenance with no support team.
- Administered business operations through a custom admin system, managing user access, product listings, content updates, and customer support across the full product catalog.
- Executed ongoing Facebook advertising campaigns and optimized customer acquisition workflows, converting Messenger inquiries into completed website purchases.

### Software Engineer II

Kyocera Document Solutions Philippines | Cebu City, Philippines | August 2024 - March 2025

- Developed and maintained an enterprise device management platform used to centrally monitor and administer multi-functional printers across multiple client sites in different locations.
- Collaborated with cross-functional teams (development, QA, and support) to deliver software enhancements and resolve issues, consistently meeting project deadlines.
- Performed root-cause analysis on recurring printer and application issues, validating fixes that resolved long-standing reliability problems.

### Application Systems Engineer

Weserv Systems International (Fujitsu) | Cebu City, Philippines | January 2021 - September 2024

- Developed and enhanced a Learning Management System (LMS) used by 100+ employees to track training progress and certification records.
- Led certification management workflows as the team member responsible for the feature within a 4-person development team, building and maintaining the system using React.js and Java to streamline tracking and reduce manual administrative work.
- Diagnosed and resolved frontend application issues, introducing unit tests that improved code quality and reduced post-release defects.

### **Associate Software Engineer**

Accenture Philippines | Cebu City, Philippines | February 2020 - October 2020

- Diagnosed usability issues in internal web applications and redesigned interface elements to streamline daily workflows for internal teams.
- Standardized Git branching and merge practices across the team, cutting recurring code conflicts and easing collaboration on shared codebases.
- Served as a key point of contact between developers, team leads, and stakeholders to unblock active projects and keep delivery on schedule.

### **Data Analyst**

Intrinsic Consultancy and Technology Solutions | Cebu City, Philippines | June 2019 - February 2020

- Queried and validated large datasets via SQL to surface trends used directly in stakeholder reporting and audit preparation.
- Built recurring SQL-based reporting processes that gave auditors reliable, audit-ready data, reducing back-and-forth during compliance reviews.

## **EDUCATION**

---

### **Cebu Technological University - Argao Campus**

Bachelor of Science in Information and Communication Technology  
Argao Cebu, Philippines | 2015 - 2019
